### How Percentiles Work

TOP HERD

MAX

75th Percentile

50th Percentile

25th Percentile

If all the herds (animals could be substituted for herds) were arranged in order from lowest to highest, the 75th percentile would be the value of the herd that is better than 75% of all the other herds. The 99th percentile value is that which is better than 99% of all the other herds.
