Publishable Herd Listing Criteria/Criteres publiables de liste de troupeau

The following rank listings of our highest production herds on Publishable milk recording programs (Supervised or 24 hrs AP) are based on the Annual Summary reports generated for each herd enrolled with CanWest DHI.

This report is a detailed summary of production and BCA for milk, butterfat, and protein for eligible records that reached 305 days in milk, or terminated at or before 305 days in milk, between January 1 and December 31. The following were used in the development of our listings:

(1) ENROLMENT: Records must be completed under a Publishable Service Plan.

(2) NUMBER OF RECORDS: Herds with at least five records are included.

(3) EQUAL TO OR GREATER THAN COUNTY OR PROVINCIAL AVERAGE:

All Publishable herds with composite BCAs equal to or greater than the average composite BCA for the province or their respective county/district have been printed.

(4) PERCENTAGE OF PUBLISHABLE RECORDS: In order for a herd to be included in the listing, 50% or more of the total records contributing to the herd's average must be Publishable.

(5) TIES: In the event of a tie in average composite BCA, the tie is broken in the following sequence: most records, highest herd protein BCA.

(6) BREED CODES: Single letters have been used to denote breed:

(A) Ayrshire; (H) Holstein; (B) Brown Swiss; (J) Jersey; (G) Guernsey;

(M) Milking Shorthorn

(7) MULTI-BREED: Herds with averages based on more than one breed are indicated by multiple breed codes at the end of the record. These codes are listed in order of breed predominance within the herd (highest to lowest).

(8) COUNTY BORDERS: When a farm borders two counties, the Progress Report listing will be the same as the location indicated on the DFO license.

Ontario production is summarized on an annual basis, not only as a service to herd owners, but also to plot progress of production levels on a provincial, breed and service basis. Many counties/districts use the ranked information to calculate production awards in recognition of dairy producer achievements in their local area.

Le classement suivant des troupeaux les plus productifs inscrits à des programmes officiels de contrôle laitier (service de 24 heures supervisé ou service alternatif publiables), est basé sur le sommaire annuel de produit pour chaque troupeau inscrit auprès de CanWest DHI.

Ce rapport constitue le sommaire détaillé de la production et des MCR de lait, de matière grasse du lait et de protéine pour les animaux admissibles en lactation pendant 305 jours ou dont la lactation s'est terminée à 305 jours ou avant, entre le 1er janvier et le 31 décembre. Ce qui suit a été employé dans le développement de nos listes :

(1) INSCRIPTION : Les relevés doivent être inscrits à un plan de service publiable.

(2) NOMBRE D'ANIMAUX INSCRITS : Les troupeaux ayant plus de cinq relevés sont compris dans le rapport de production.

(3) ÉGALITÉ OU SUPÉRIORITÉ À LA MOYENNE DU COMTÉ

OU DE LA PROVINCE : Les relevés publiables de tous les troupeaux munis de composants de MCR égaux à ou supérieurs à la moyenne des composants MCR de la province ou de leur comté/district ont été publiés.

(4) POURCENTAGE DES RELEVÉS PUBLIABLES : Afin qu'un troupeau soit inclus sur la liste, 50% ou plus, de tous les relevés contribuant à la moyenne du troupeau, doivent être publiables.

(5) EX-AEQUO : Dans le cas où il y aurait au moins deux troupeaux avec le total des moyennes de MCR égal, l'ordre serait choisi selon les critères suivants: le nombre de relevés le plus élevé, la moyenne de MCR en protéine la plus élevée.

(6) CODES DES RACES : Une seule lettre a été utilisée pour identifier la race:

(A) Ayrshire; (H) Holstein; (B) Suisse Brune; (J) Jersey; (G) Guernsey;

(M) Shorthorn Laitier

(7) MOYENNE MULTI-RACE : On identifie les troupeaux dont la moyenne est basée sur celle de plus d'une race par le code de plusieurs races à la fin du dossier. Ces codes sont classés par ordre d'importance des races dans le troupeau (de la plus importante à la moins importante).

(8) LIMITES DU COMTÉ : Lorsqu'une exploitation est à la limite de deux comtés, l'emplacement indiqué dans le classement du Rapport de production sera le même que celui qui est inscrit sur le permis de le DFO.

La production de l'Ontario est résumée chaque année, non seulement pour rendre service aux propriétaires de troupeaux, mais également pour suivre la progression des niveaux de production provinciale, par troupeau et par service. De nombreux comtés et districts se servent des renseignements du classement pour préparer la remise des prix de production soulignant les réussites des producteurs de lait dans leur région.

DHI Privacy Policy Summary

The information collected by CanWest DHI, voluntarily provided by producers through testing services, is available to customers in paper and electronic forms. Access to information by advisors and/or any other parties via mail, email, website, or otherwise, requires explicit customer consent.

Herds enrolled on DHI services may have information published for awards and recognition purposes with Annual Summaries and year-end publications. Additionally, selected information from all customers will be provided to Canadian Dairy Network for the calculation of genetic indexes and sire proofs. Where applicable, information is provided to various breed associations for recognition and breed improvement programs. Participation in DHI testing programs implies consent for the release of data to these third party organizations, unless otherwise stated to DHI.

From time to time, CanWest DHI provides marketing services to third party agricultural organizations. All methods of distribution of marketing materials maintain producer confidentiality. No producer information is sold, traded or otherwise shared.

CanWest DHI operates under Canada's Personal Information Protection and Electronic Documents Act (PIPEDA).

Please Note: This is a summary of the DHI Privacy Policy. For the complete statement, please visit www.canwestdhi.com.

Les troupeaux en gris ont une moyenne inférieure à la moyenne du comté mais supérieure à la moyenne MCR provinciale de 208.6 pour troupeaux publiables (Calculé sur une base de troupeau) *plus de 2x contrôles (toute ou partie de l'année).
Afin qu'un troupeau soit inclus sur la liste, 50% ou plus, de tous les relevés contribuant à la moyenne du troupeau, doivent être publiables.

Les troupeaux en gris ont une moyenne inférieure à la moyenne du comté mais supérieure à la moyenne MCR provinciale de 208.6 pour troupeaux publiables (Calculé sur une base de troupeau) *plus de 2x contrôles (toute ou partie de l'année).
Afin qu'un troupeau soit inclus sur la liste, 50% ou plus, de tous les relevés contribuant à la moyenne du troupeau, doivent être publiables.

Les troupeaux en gris ont une moyenne inférieure à la moyenne du comté mais supérieure à la moyenne MCR provinciale de 208.6 pour troupeaux publiables (Calculé sur une base de troupeau) * plus de 2x contrôles (toute ou partie de l'année).
Afin qu'un troupeau soit inclus sur la liste, 50% ou plus, de tous les relevés contribuant à la moyenne du troupeau, doivent être publiables.

Les troupeaux en gris ont une moyenne inférieure à la moyenne du comté mais supérieure à la moyenne MCR provinciale de 208.6 pour troupeaux publiables (Calculé sur une base de troupeau) *plus de 2x contrôles (toute ou partie de l'année).
Afin qu'un troupeau soit inclus sur la liste, 50% ou plus, de tous les relevés contribuant à la moyenne du troupeau, doivent être publiables.
