

HARM KELLY

Harm and his wife Petrina, with their seven children, operate a dairy farm in Dunnville, ON. They are currently milking 105 cows using DeLaval robots. They raise all of their registered replacement stock, using primarily Semex genomic sires. Young calves are raised in a calf barn on an automatic calf feeder and they are currently working on installing a Rovibec automatic feeding and bedding system.

Harm attended Brock University (2005) majoring in Biology and Psychology. Harm also completed a Masters Degree in Cognitive Neuroscience at the University of Waterloo (2011). With a growing family, Harm decided to return to the home farm to raise his family.

Following completion of the Future Leaders' Program (sponsored by CanWest DHI, DFO, EastGen and Holstein Canada), Harm was interviewed and subsequently appointed to the CanWest DHI to fill a vacancy in 2016 and then elected to the board in 2017.

With the Lactanet partnership (CanWest DHI, Valacta and CDN), Harm was selected as one of two Ontario directors to fill a director position on the Lactanet Board in April 2019.

Harm was appointed to the DairyGen Advisory Committee in 2017; is currently serving on the Dairy Traceability Committee and is also Chair of Lactanet's Finance, Audit and Risk Committee.
