

The following material contains a more detailed look at herd management topics. They are useful for distance education, resource library or employee training. Sit back and watch with staff or other producers to learn and discuss the content. Each disk costs \$20.00.

Steps to Improved Hoof Health
Perhaps the most common complaint of dairymen is 'sore feet' problems in cows. This video looks at the most common causes and offers practical solutions to improving foot health in cows. Quizzes and take home projects are included.

CD or DVD

Realizing Potential - Earlier Productivity Pays
This video gives a detailed look at current performance and it's costs and shows how to produce well-grown heifers milking well by 24 months. Quizzes and take home projects are included.

CD or DVD

Getting Cows Pregnant
Does reproduction failure happen because we don't fully understand how the cow's reproductive system works? This video gives a detailed look at the reproductive cycle and discusses the best ways to assure continued success in 'settling' cows. Quizzes are included.

CD or DVD

Managing Milk Components for Profit
This video gives a detailed look at how nutrition affects milk components and the impact on profitability. It is designed as an in depth course and contains detailed nutritional information. Quizzes and take-home projects are included.

CD or DVD

EDUCATIONAL VIDEOS ON HERD MANAGEMENT, DHI SERVICES AND PRODUCTS

IDEAL FOR...

Distance Educational Learning | Refresher and Resource Library | Employee Training | Small Group Discussion Material

The following material is related to DHI products and services and are provided at no charge to dairy producers.

Learn at home!

At the convenience of your own time, and in the comfort of your own home, you now have the tool that teaches you about important herd management techniques.

Created by CanWest DHI, these informative video presentations cover numerous topics that offer suggestions and insight on how to make improvements to your dairy operation.

To receive or purchase your copy, contact your DHI fieldstaff or DHI Customer Service at 1-800-549-4373.

Understanding ROF

An overview of the Return over Feed Program (ROF), shows how the program works and some of the results that have been found to date. Details of how to register for the program, fill in the input forms, read the reports and interpret the benchmarks are included in this video.

CD Only

Overview of Dairy Comp Programs

A look at the most used herd management software in North America. The video gives a brief overview of the simplicity of data entry and some of the reports that are possible. It shows how the program fits farm advisors and producers whether they wish it to link with electronic parlors or not.

CD Only

How to use Dairy Comp SCOUT

This video is a more detailed step by step approach to using the most popular Dairy Comp product in Canada. By showing how to use each menu entry item of the program, it is a very good resource for SCOUT owners and shows what to expect for those considering the purchase of the product.

CD or DVD

The following material is related to DHI products and services and are provided at no charge to dairy producers.

Also Available:

- ▶ Energy & Fibre

- ▶ Major Minerals
- ▶ Trace Minerals

valacta

Nutritional Concepts in Dairy Cattle is produced by Valacta (Quebec DHI). Each topic area is available for \$35.00.

More information about these CD s is available upon request.

Evaluating a Herd Using DHI Reports

This video shows how to go through each DHI report and shows how to identify changes and trends in the herd. By knowing what is happening, you have a better opportunity to make the most profitable decision.

CD or DVD

Understanding DHI Annual Reports

This video shows how to go through the DHI Annual reports with a full understanding. An excellent aid when looking at reports that are only seen once per year.

CD or DVD

Johne's Disease - Facts and Strategies

With more emphasis recently on the impact of Johne s Disease, this video shows statistics of the current situation as well as a well laid-out calf management plan that will allow you to control or prevent the disease.
