222	DRY	29/08/11	NOV01.4	30/8/11	4/10/11	A	MM	N	IMM	Y	

The record of treatments administered to animals is found in the **Treatment Log**.

To access the Treatment Log in **Dairy Comp**:

- in SCOUT: **File > CQM Reports** and select **Run Report** and enter the date range to view.
 - in 305: Look under **File** or **Health > Treatment Log** and select **Run Report** and enter the date range to view.
- If Treatment Log is not located in these menus, it can be accessed by typing **ECON\CQM** in the command line.

This will provide a complete list of treatments with the required details for each animal. The recommendation for protocol remark (REM) is a short form of the drug, followed by the number of days treated and the amount given each day. The **Details** section allows space for extra protocol details, such as listing drugs used in combination or protocols using multiple treatment modes.

CQM MODULE IN DAIRY COMP

To locate the CQM module in **Dairy Comp**:

- go to **File > CQM Information**

Logs and Reports

Click on **Logs and Reports** for Records 8 to 15.

Record 9: Medicine Inventory

To view list of medicine inventory:

- click on **Display/Print Medicine Inventory**
- select **Current - Not Deleted**
- click on **Print** to view inventory list

The screenshot shows the Dairy Comp Scout / 305 interface. At the top, there's a navigation bar with 'CQM Canadian Quality Milk Module' and 'Dairy Comp Herd Management Software'. Below that, a menu bar includes 'CQM Setup', 'CQM Help', 'Standard Operating Procedures', 'Logs and Reports' (circled in red), and 'Corrective Actions'. The main content area is titled 'Logs and Reports' and lists several records with associated actions:

- Record 8 - Veterinary Prescription - Your Veterinarian is responsible for providing a prescription for treatments. Action: **Print Prescription**
- Record 9 - List of Medicines & Chemicals. Actions: **Add to Medicine Inventory**, **Print List of Medicines**, **Display / Print Medicine Inventory** (Print Landscape)
- Record 10 - Livestock Treatment Protocols. Actions: **Add to Treatment Protocol**, **Print List of Treatment Protocols**, **Print Letter of Guarantee**, **Display / Print Protocols** (Print Landscape)
- Record 11 - Broken Needles. Description: Use Dairy Comp Scout / 305 to record broken needles.
- Record 12 - Bulk Tank Temperature Log. Actions: **Add to Bulk Tank Log**, **Print Bulk Tank Temperature Log**, **Display / Print Logs**
- Record 13 - Milking Equipment Sanitation Report. Actions: **Add to Sanitation Record**, **Print Milking Equipment Record**, **Display / Print Sanitation Report** (Print Landscape)

Livestock treatment protocols for SCOUT and 305

record10.txt - WordPad

Record 10

Farm Name: Moyer Holsteins
Milk License: 12345

Sorted By: DC305 Event Include: Active Printed: 30 - Sep - 2011
